

Dataset-level flow

Search completed 21 August 2026

Identification

Records identified

GEO, n = 263
ArrayExpress, n = 54
PubMed-derived accessions, n = 57
Total, n = 374

Screening

Records screened

After deduplication, n = 322

Eligibility

Full records assessed

Accession and sample metadata reviewed, n = 53

Included

Datasets included

11 GEO Series representing
9 independent source studies

Primary synthesis

3 independent glomerular sources

Records removed before screening

Duplicates, n = 52

Excluded at title/summary

n = 269

Excluded after full review

n = 42
Ineligible contrast/specimen/assay,
experimental model, or duplicate source
